PROFILE

Junior frontend developer with hands-on experience building responsive, production-style interfaces using React, Next.js, Tailwind CSS, and TypeScript. Comfortable turning Figma designs into clean, componentized code and structuring maintainable project architectures with Vite and modern tooling. Currently building professional projects to strengthen my portfolio and gain industry experience, while expanding my skills in REST APIs and testing. Actively seeking junior front-end opportunities to apply my skills and grow with a collaborative team.

TECHNICAL SKILLS

Proficient: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap 5, Figma-to-Code, Git / GitHub, Vite

Learning: REST APIs, Testing

PROJECTS

Loom — Social Media Web App

[Live Demo: loom-steel-eight.vercel.app](#) • [GitHub: github.com/moazmostafa569](#)

- Tech stack: React, Tailwind CSS, REST API integration.
- Developed a social media application using React and Tailwind CSS, integrated with the Route Academy Linked Posts API.
- Built core social features including feed, profile, notifications, saved posts, and authentication (register/login) flows.
- Designed a distinctive visual identity with a custom color system and typography, applied consistently across every screen.
- Organized API service files and component logic into separate layers to keep the codebase maintainable and easy to extend.

Adasa — Web Application

[Live Demo: adasa-kappa.vercel.app](#)

- Tech stack: React, Tailwind CSS.
- Built a responsive, component-based interface using React and Tailwind CSS, focusing on clean layout structure and consistent visual design.
- Organized reusable UI components to keep the codebase readable and easy to extend.

Quiz App

[Live Demo: quiz-app-six-nu-69.vercel.app](#)

- Tech stack: JavaScript, Bootstrap 5, CSS3.
- Developed an interactive quiz application with dynamic question rendering, score tracking, and responsive layout using Bootstrap 5.
- Implemented core logic in vanilla JavaScript, including state handling for questions, answers, and results without a front-end framework.
